PROFILE SUMMARY

B.Tech student specializing in Artificial Intelligence and Data Science, with a strong foundation in Python, Machine Learning, and Data Analysis. Hands-on experience in building real-world projects, including NLP-based applications. Passionate about problem-solving, writing efficient code, and continuously improving through learning and practical implementation. Seeking internship and placement opportunities to apply technical skills and gain industry experience.

EDUCATION

- **Bachelor of Technology (Computer Science and Engineering)(Artificial intelligence and Data science)**
CGC University Mohali
CGPA:8.21
2024–2028
- **Secondary School Education**
Govt (Boys) Sr. Sec. School Nadaun
Percentage: 83.2%
2021

Projects

RoboDoctor AI

- Developed an AI-powered healthcare assistant to provide preliminary medical guidance and symptom-based health analysis using Machine Learning and NLP techniques.
- Implemented data preprocessing, symptom classification, and predictive analysis using libraries like Pandas, NumPy, Scikit-learn, and TensorFlow.
- Built an interactive user interface using Streamlit for real-time health query responses and medical assistance.

Fake News Detection System

- Developed an NLP-based web application to detect fake news articles using Machine Learning techniques.
- Implemented text preprocessing, feature extraction, and classification using libraries like Pandas, NumPy, and Scikit-learn.
- Built an interactive user interface using Streamlit for real-time news analysis.
- Improved accuracy by applying appropriate ML algorithms and data cleaning techniques

Social Media Fake Accounts Detector

- Developed a machine learning-based system to identify fake social media accounts using user data and behavior patterns.
- Applied data preprocessing and classification techniques to distinguish between genuine and fake profiles.
- Built using Python with libraries for data analysis and model implementation.

UAC Care Load Analytics

- Developed an end-to-end healthcare capacity analytics and forecasting platform
- using Python, Pandas, NumPy, and Streamlit to analyze operational care-load data. implemented time-series forecasting using Prophet, including future load prediction, forecast confidence analysis, capacity-stress assessment, and scenario-based planning
- Built interactive dashboards using Plotly and Streamlit with executive KPIs, risk intelligence, data exploration, trend analysis, and automated insights.

Skills

- **Programming:** Python, C, SQL,
- **Data Science:** Pandas, NumPy, Matplotlib, Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis
- **Machine Learning & AI:** Scikit-learn, PyTorch, Machine Learning, Deep Learning, Natural Language Processing (NLP)
- **Computer Science:** Data Structures & Algorithms, Object-Oriented Programming,
- **Databases:** MySQL, DBMS
- **Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Streamlit

Certifications

- Infosys Python Fundamentals Certification 
- AI Tools & ChatGPT Workshop — Workshop Participation 
- Automation Engineering Workshop Participant 
- Limca Book of Records Participation 
- Nano Banana Workshop by Google 
- Escape Da Vinci National Hackathon Participant 
- Smart India Hackathon Participant 
- Hack-N-Win 3.0 Hackathon Participant 

ACHIEVEMENTS & LEADERSHIP

- Google Student Ambassador — 2026
Selected as a Google Student Ambassador and currently contributing to student focused technology initiatives, community engagement, and content activities.
