Profile summary

B.Tech student specializing in Artificial Intelligence and Data Science, with a strong foundation in Python, Machine Learning, and Data Analysis. Hands-on experience in building real-world projects, including NLP-based applications. Passionate about problem-solving, writing efficient code, and continuously improving through learning and practical implementation. Seeking internship and placement opportunities to apply technical skills and gain industry experience.

Education

- Bachelor of Technology in AI & Data Science

Chandigarh Group of Colleges, Mohali
CGPA: 8.21

2024–2028

- Senior Secondary Education)

HP Board
Percentage: 74.0%

2023

- Secondary School Education

HP Board
Percentage: 84%

2021

Projects

RoboDoctor AI | Next.js, Python, FastAPI, Scikit-learn, Gemini, Firebase

[\[LINK\]](#)

- Built and deployed an AI healthcare platform with Vital Check ML (Gradient Boosting) trained on 2,000 records and 20 features, achieving 91.50% accuracy, 91.62% precision, and 91.46% F1-score across 3 risk classes.
- Engineered a cosine-similarity content-based recommendation system generating up to 4 personalized recommendations, integrated with safety-priority detection for critical health signals.
- Developed Gemini-powered conversational AI, multimodal skin screening, lab analysis, reminders, emergency tools, and nearby-care discovery using Next.js API routes, FastAPI, Firebase, Vercel, and Render.

UAC Care Load Analytics | Python, Streamlit, Plotly, Pandas, NumPy, Prophet

[\[LINK\]](#)

- Built an end-to-end healthcare capacity analytics dashboard with interactive KPIs, risk intelligence, AI-driven insights, and automated reporting.
- Implemented Prophet time-series forecasting for care-load prediction, capacity-stress analysis, forecast confidence, and scenario planning.
- Developed a Power BI/Tableau-inspired interface with dynamic filtering, anomaly detection, data exploration, and interactive Plotly visualizations.
- Applied data validation, feature engineering, model evaluation, and automated testing to deliver a production-style analytics platform.

VeriLens — AI-Powered Misinformation Verification System | Python, NLP, Transformers, Streamlit, NewsAPI

[\[LINK\]](#)

- Developed an AI-powered misinformation verification system that analyzes news URLs and text claims using source-trust analysis, emotional-tone detection, and live cross-source news verification.
- Integrated a DistilRoBERTa-based emotion detection pipeline with web scraping and NewsAPI to extract article content, identify emotional signals, and compare claims against live news coverage.
- Engineered a credibility scoring pipeline combining source trust, emotional intensity, and cross-source coverage signals to flag potentially unreliable information.

Fake Social Media Accounts Detector | Python, Scikit-learn, Random Forest, Streamlit

[\[LINK\]](#)

- Developed a machine learning system to detect fake social media accounts using profile and behavioral features including followers, following, posts, profile completeness, and engagement ratios.
- Engineered and standardized account-level features using Pandas, NumPy, and StandardScaler, and trained a Random Forest classifier for binary account classification.
- Achieved 86.83% test accuracy with 0.87 precision, 0.87 recall, and 0.87 F1-score across 600 test samples.
- Deployed the trained model using Streamlit, enabling interactive real-time prediction and dataset analysis through a web-based interface.

Skills

- **Programming Languages:** Python, C, SQL.
- **Tools & Databases:** MySQL, Git, GitHub, VS Code, Jupyter Notebooks.
- **Data Science:** Pands, Numpy, Matplotlib, Data Cleaning, Statistics, EDA.
- **Machine Learning:** NLP, Scikit-learn, Transformers, TF-IDF, Random Forest, Model Evaluation, Random Forest, Logistic Regression, Decision Trees, KNN, SVM, Naive Bayes.
- **Core CS:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP).
- **Soft Skills:** Problem solving, Leadership, Communication.

Achievements / Experience

- **Google Student Ambassador — 2026:** Selected as a Google Student Ambassador, contributing to student technology initiatives and community engagement.
- **Internship** — Unified Mentor Pvt. Ltd., Haryana: Completed a 3-month internship from June–August 2026, gaining hands-on experience in AI/ML development, data analysis, and real-world project implementation, while applying technical skills in a professional environment.

Certifications

- | | |
|---|------------------------|
| - InfosysPythonFundamentals Certification — Certified by Infosys | [LINK] |
| - Automation Engineering Workshop Participant — CGC University Mohali. | [LINK] |
| - AI Tools & ChatGPT Workshop — Certified by be10x. | [LINK] |
| - Limca Book ofRecords Participation — Certified by CGC University Mohali. | [LINK] |
| - Smart India Hackathon Participant 2025 — Certified by CGC University Mohali. | [LINK] |
| - Hack-N-Win 3.0 Hackathon Participant — Certified by CGC University Mohali. | [LINK] |
| - Nano Banana Workshop — Certified by Google Student Ambassodor. | [LINK] |
| - Escape Da Vinci National Hackathon Participant — Certified by CGC University Mohali. | [LINK] |
